

TRUWOOD REVERSIBLE TRIM

FEATURES/BENEFITS

Durable: You just can't find a trim as reliable as TruWood. Thick and attractive, it delivers proven performance time and time again. Available in nominal 4/4" and 5/4" thicknesses.

Stylish: Seize a design opportunity and specify TruWood Trim. Produced from residual wood fibers, TruWood Trim is free of knots and other natural flaws.

Versatile: TruWood Trim is reversible, doubling application possibilities. One side features the popular Old Mill® textured surface, created to replicate the look of natural cedar. Turn the trim over for a smooth surface that complements all siding textures.

Pre-primed: With a consistent surface that's ready to accept paint and exterior top-coats, TruWood's industry-leading coating technology ensures uniformly primed boards for added weather protection.

Easy to install: Installation is quick and simple, with no need for special tools. Plowed back on fascia board simplifies soffit insertion, and standard 16' lengths with no short or random lengths mean less waste. And it's backed up by a 30-year warranty.

Designer's choice: TruWood Trim is the best choice whenever designs call for wood trim. And it nicely complements every exterior cladding available. Available in nominal 2", 3", 4", 6", 8", 10" and 12" widths, our trim can be used as band board, corner board, door trim, fascia, rake board, soffits and window trim.

For a product you can depend on, specify lasting quality and beauty...specify TruWood Siding and Trim.

Siding: Use matching TruWood Siding to complement your project.

Green matters:

- Recycled content is 3rd party certified by Scientific Certification Systems (SCS)
- No UF resin
- Maximum fiber utilization and recovery
- TruWood Sidings available with FSC certification
