

# TruDistinction

TruQuality. TruProtection. With a legacy of excellence and products engineered to endure, TruWood leads the way in beautiful, sustainable, lasting trim and siding. Discover how our family-owned company has earned a reputation for unparalleled commitment to our customers, our quality and our planet. Find what's Tru to you.

## **Made to stand the test of time. And nearly everything else.**

Bring us your harshest conditions. Your toughest climates. Your most determined insects. They're no match for our siding and trim treated with EcoGuard™.

Proven to defy heat, mildew and insects, EcoGuard zinc borate resists fungal decay and termite damage decade after decade. And because it's a naturally occurring additive, EcoGuard is safe for use around children and pets, so you can protect your family, right along with your investment.

Engineered to perform. Designed to protect.  
TruWood with EcoGuard means beauty that endures.

# TruAdvantages

**EcoGuard™** Zinc borate process resists mildew, rot and termite damage.

**Consistency:** Produced with in-line process controls for production consistency.

**Versatility:** The most complete selection of styles and patterns in the industry with a variety of patterns, 16 ft lengths, widths from 2 in-12 in, and 5/8, 3/4 and 1 in thicknesses.

**Character:** Rough sawn cedar texture and reversible trim with smooth/textured faces lend distinctive style.

**Reliability:** The assurance of quality and reliability, backed by our 30-year transferable warranty.

**Weather-resistance:** Products factory-primed with the industry-leading coating for added weather protection and a great topcoat surface. All backed by our 5-year primer warranty.

**Durability:** Our siding and trim won't check, split or crack, and are knot-free.

**Easy:** Engineered wood makes for easy cutting, tooling and nailing.

**Green:** Commitment to the planet begins with products manufactured from residual wood fiber and continues with sustainable practices certified by FSC® and SCS.
