

COMPOSITE PANEL ASSOCIATION

Advancing the wood-based panel and decorative surfacing industries

April 1, 2008

Mr. Donn Jensen
Collins Products LLC
6410 Highway 66
Klamath Falls, OR 97601

Dear Mr. Jensen,

We would like to congratulate Collins Products in Klamath Falls Oregon on your approval and acceptance into the Composite Panel Association's Environmentally Preferable Product (EPP) specification 3-08 program on your industrial particleboard (IND) production. By participating in this American National Standards Institute (ANSI) accredited program you are demonstrating a strong commitment to environmental stewardship and advancing the industry's message.

Key areas of participation in the program include:

- Strict adherence to using 100 percent recycled material as a fiber source
- Voluntarily maintaining formaldehyde emissions below CCR 93120.2 (CARB Composite Wood ATCM Phase I) 0.18 parts per million limit.
- Quarterly fiber source audits
- Monthly emissions audits

Congratulations again on your accomplishment and you may begin to use the EPPS CPA 3-08 logo on your certified products immediately.

Best regards,

Christopher Surak
Director of Certification Services
